

### REMARKS

Claims 1-19 are pending. Claims 8, 11, 15 and 18 are amended herein.

#### Double Patenting Rejections

Claims 1-19 are provisionally rejected under the judicially created (nonstatutory) doctrine of obviousness-type double patenting as being unpatentable over Claims 1-30 of copending US Application No. 09/912,847. A terminal disclaimer in compliance with 37 CFR § 1.321 is being submitted concurrent with the instant response, thereby obviating the double patenting rejection.

Claims 1-19 are provisionally rejected under the judicially created (nonstatutory) doctrine of obviousness-type double patenting as being unpatentable over Claims 1-26 of copending US Application No. 09/912,645. A terminal disclaimer in compliance with 37 CFR § 1.321 is being submitted concurrent with the instant response, thereby obviating the double patenting rejection.

#### 102 Rejection

Claims 1-19 are rejected under 35 U.S.C. § 102(b) as being anticipated by Cohen (US 6,060,993). The Applicant has reviewed the cited reference and respectfully submits that the present invention as recited in Claims 1-19 is neither anticipated nor rendered obvious by Cohen.

Independent Claim 1 recites that an embodiment of the present invention is directed to a "vehicle comprising ... a position determination system adapted to determine a position and a direction of travel of said vehicle" wherein content is selected "according to said position and said direction of travel" (emphasis added). Independent Claim 8 recites that an embodiment of the present invention is directed to a "method comprising the steps of ... determining a position and a direction of travel of a mobile vehicle using a position and direction determination system" and "selecting content ... according to said position and said direction of travel" (emphasis added). Independent Claim 15 recites that an embodiment of the present invention is directed to a "method comprising the steps of ... selecting an item of said content according to a position and a direction of travel of said mobile vehicle ..., said position and said direction of travel determined using a position and direction determination system" (emphasis added). Claims 2-7 are dependent on Claim 1, Claims 9-14 are dependent on Claim 8, and Claims 16-19 are dependent on Claim 15; these claims recite further features of the present claimed invention.

Applicant respectfully submits that Cohen does not show or suggest the present claimed invention as recited in independent Claims 1, 8 and 15. Cohen only shows a GPS receiver for determining a location. Cohen does not show a position determination system (or a position and direction determination system) for determining position and direction of travel. In particular, Cohen does not show or suggest a position determination system (or a position and direction determination system) as recited in Claims 4, 11 and 18.

Therefore, Applicant respectfully submits that Cohen does not show or suggest the present claimed invention as recited in independent Claims 1, 8 and 15. As such, Applicant respectfully submits that Cohen also does not show or suggest the present claimed invention as recited in Claims 2-7, 9-14 and 16-19 dependent on Claims 1, 8 or 15. Accordingly, Applicant respectfully submits that Claims 1-19 traverse the basis for rejection under 35 U.S.C. § 102(b).

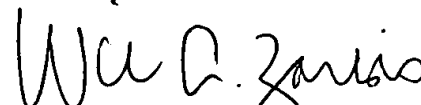

### CONCLUSION

In light of the above remarks, reconsideration of the rejected Claims is respectfully requested. Based on the arguments presented above, it is respectfully asserted that Claims 1-19 overcome the rejection of record and, therefore, allowance of these Claims is respectfully solicited.

The Examiner is invited to contact Applicant's undersigned representative if the Examiner believes such action would expedite resolution of the present Application.

Date: 11/4/02

Respectfully submitted,
